

To Whom it may Concern:I understand the National Association og Broadcasting is support legislation that would limit my ability to obtain information. I use this information every day geting in around and out if cities every day. I feel Satelllite radio needs to be left alone! I pay for this service! This is something we the truck driver has needed for a long time.

The entertainment , traffic and weather conditions regardless of the time of day of night is a grate resource to me, no matter what part of the county I'am in.

Sincerely
Don Brooks
